

## **Home Power Saver**

*Offering You Simple Solutions That Motivate You To Save On Electricity Costs!*

Let's face it knowing where to save on electricity costs can be hard. Because it's so difficult to know where to start! But for householders stepping on the road to home electricity reduction one thing is for sure, they all wish they had started a long time ago!

It's never too late to start slashing your electricity costs! With increased awareness and education, you could be starting your own home energy reduction program today, supplying you with repeated electricity savings from tomorrow!

### **How Are You Charged For Electricity Usage?**

The key to understanding electricity savings, is firstly to know how your billed for electricity. Most Australian households unfortunately do not! Is it not the time, you moved on from being just a bill payer?

### **Where Are You Using The Electricity?**

Once you fully understand the billing procedure, the next step is to work out how much electricity your using and where!

### **Where Do You Reduce Electricity Usage?**

Reducing electricity once it is known where it is used, can still be difficult for householders. Options can be varied and may not always be that obvious. Options that may involve understanding detailed charges & tariffs, electricity usage and other service usage patterns, reduced energy appliances and other energy efficient alternatives.

### **Who Offers Electricity Reduction Help?**

You could call your electricity provider, but you may find the information offered too generic. You could call an electrician, but they may be unwilling to assist in all areas.

If though, your after independent advice from a professional home electricity reduction business, dealing with householders whom are all suffering from high electricity costs on a daily basis.
